

You will need to use a calculator for this worksheet

1

The diagram shows the curve  $y = x^2$  which passes through the point  $A(1, 1)$  and the point  $B$ .

- a Copy and complete the table to find the gradient of the chord  $AB$  when the  $x$ -coordinate of  $B$  takes each of the given values.

$x$ -coordinate of $B$	$y$ -coordinate of $B$	gradient of $AB$
2	4	$\frac{4-1}{2-1} = 3$
1.1	1.21	
1.01		
1.001		

- b Suggest a value for the gradient of the tangent to the curve  $y = x^2$  at the point  $(1, 1)$ .
- c Repeat part a using 0, 0.9, 0.99 and 0.999 as the  $x$ -coordinates of  $B$  and comment on your answer to part b.
- 2 Use a similar table of values to that in question 1 to find a value for the gradient of the tangent to the curve  $y = x^2$  at the point  $A$  when  $A$  has the coordinates
- a  $(2, 4)$                       b  $(4, 16)$                       c  $(1.5, 2.25)$                       d  $(-3, 9)$
- 3 a Using your answers to questions 1 and 2, suggest an expression in terms of  $x$  for the gradient of the curve  $y = x^2$  at the point  $(x, y)$ .
- b Write down the gradient of the curve  $y = x^2$  at the points
- i  $(6, 36)$                       ii  $(2.4, 5.76)$                       iii  $(-3.2, 10.24)$
- 4 By considering the gradient of a suitable sequence of chords, find a value for the gradient of each curve at the given point.
- a  $y = x^4$  at  $(1, 1)$                       b  $y = x^2 - 5x + 3$  at  $(2, -3)$
- c  $y = \sqrt{x}$  at  $(4, 2)$                       d  $y = \frac{2}{x}$  at  $(2, 1)$
- 5 a By considering the gradient of a suitable sequence of chords, find a value for the gradient of the curve  $y = x^3$  at the points
- i  $(1, 1)$                       ii  $(2, 8)$                       iii  $(3, 27)$
- b Suggest an expression of the form  $kx^n$  for the gradient of the curve  $y = x^3$  at the point  $(x, y)$ .
- c Find the gradient of the curve  $y = x^3$  at the points
- i  $(4, 64)$                       ii  $(-2, -8)$                       iii  $(1.5, 3.375)$
