Name:

## GCSE (1-9)

## Scale Drawings

## Instructions

- Use black ink or ball-point pen.
- Answer all questions.
- Answer the questions in the spaces provided
- there may be more space than you need.
- Diagrams are NOT accurately drawn, unless otherwise indicated.
- You must show all your working out.

## Information

- The marks for each question are shown in brackets
- use this as a guide as to how much time to spend on each question.

## Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end

1 The accurate scale drawing shows a small box and a large box

The small box has a real height of 20 centimetres.
Find an estimate for the real height of the large box.

2 The accurate scale drawing shows a garage and a house.

The garage has a real height of 2.4 metres.
Find an estimate for the real height, in metres, of the house.
metres

3 The accurate scale drawing shows a car.

The car has a real height of 1.5 metres.
Find an estimate for the real length, in metres, for the car.
metres

4 The accurate scale drawing shows a field.

The field has a real length of 67.5 metres
Find an estimate for the real perimeter of the field.
$\qquad$

5 The accurate scale drawing shows three towns, Town A, Town B and Town C.

Town A $X$

X Town B

X
Town C

The scale is $1: 50000$
a) Find the real distance between Town A and Town B, in kilometres.
$\qquad$ km
b) Find the real distance between Town A and Town C, in kilometres.
$\qquad$ km

6 A model car has the length of 8 cm .
The scale of the model is $1: 50$
Work out the length of the real car.
Give your answer in metres.

7 A map has the scale of 1:50000
The distance between two points on the map is 10 cm .
Work out the real distance between the two points. Give your answer in kilometres.
$\qquad$ .km

8 A model plane has the length of 20 cm .
The scale of the model is $1: 380$
Work out the length of the real plane.
Give your answer in metres.

9 A map has the scale of 1:75000
The distance between two points on the map is 12 cm .
Work out the real distance between the two points. Give your answer in kilometres.
