Name:

# GCSE (1-9) <br> <br> Perpendicular Lines 

 <br> <br> Perpendicular Lines}

## Instructions

- Use black ink or ball-point pen.
- Answer all questions.
- Answer the questions in the spaces provided
- there may be more space than you need.
- Diagrams are NOT accurately drawn, unless otherwise indicated.
- You must show all your working out.

## Information

- The marks for each question are shown in brackets
- use this as a guide as to how much time to spend on each question.

## Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end

1. 

A is the point $(0,1)$
$B$ is the point $(10,6)$
The equation of the straight line through A and B is $y=\frac{1}{2} x+1$
a) Write down the equation of another straight line parallel to $y=\frac{1}{2} x+1$
b) Write down the equation of another straight line that passes through the point $(0,1)$
$\qquad$
c) Find the equation of the line perpendicular to AB passing through B .

A straight line, L, passes through the point with coordinates $(4,7)$ and is perpendicular to the line with equation $\mathrm{y}=2 \mathrm{x}+3$.

Find an equation of the straight line L .
3.

A straight line passes through the points $(0,5)$ and $(3,17)$. Find the equation of the straight line.
4. Show that line $3 y=4 x-14$ is perpendicular to line $4 y=-3 x+48$.
5. Here are the equations of 5 straight lines.

$$
\begin{aligned}
& P: y=2 \mathrm{x}+5 \\
& Q: y=-2 \mathrm{x}+5 \\
& R: y=x+5 \\
& S: y=-\frac{1}{2} x+6 \\
& T: y=\frac{1}{2} x+1
\end{aligned}
$$

a) Write down the letter of the line that is parallel to $y=x+6$
b) Write down the letter of the line that is perpendicular to $y=2 \mathrm{x}-1$
6. The point A has the coordinates $(2,5)$ The point B has the coordinates $(6,7)$
a) Find the mid point of AB
b) Find the gradient of the line that passes through AB
c) Find the equation of the perpendiucular bisector to AB
7. A circle C has centre $(2,5)$

The point A $(11,8)$ lies on the circumference of the circle

Find the equation of the tangent to the circle at A
8. A cirlce has the equation $x^{2}+y^{2}=5$
a) Write down the centre of the circle
b) Write down the exact length of the radius of the circle

P is the point $(1,2)$ on the cirlce $x^{2}+y^{2}=5$
c) Work out the equation of the tangent to the circle at P
9. The diagram shows a circle of radius 5 cm , centre the origin.

Find the equation of the tangent to the circle at $(3,4)$

$$
(5)
$$
